Testing carried out to determine the intended results of the samples using PCR, was subcontracted to an Animal and Plant Health Agency (APHA) laboratory.

Sample 15/7232 = 15/7233

Comments provided by Scott Reaney, AHVLA

This distribution comprised of 5 samples: one sample containing ovine material, one containing porcine material, one containing bovine material and two negative samples.

All laboratories returned the expected results.
